

# Our walk-ins come in many shapes and sizes to fit any space or project

Because everyone's needs and preferences are different, our walk-ins are engineered and built to your exact dimensions and specifications.

Flexible design and modular construction techniques ensure that we are conveniently located to deliver walk-ins, which meet your

exact requirements. We offer walk-ins designed to make optimum use of available space, delivering solutions for any chilled and/or frozen storage application.

## REPLACEMENT PARTS

- Comprehensive range of parts and accessories, including hardware, thresholds, kickplates, thermometers and vents
- Large stock inventory for quick ship
- Easily retro-fitted to update existing walk-ins

## SMART DEFROST SYSTEM

- "Intelligent" system bypasses unnecessary defrosts
- Reduction of up to 40% in the number of defrosts required
- Improved energy efficiency for lower running costs and reduced environmental impact
- Helps maintain stable and uniform walk-in temperatures

## STRIP CURTAINS

- Proven and effective means of limiting warm air infiltration into walk-ins
- Significant reduction in refrigeration load
- Energy savings of up to 11%

## COMPACT FLUORESCENT LIGHTING

- Consumes up to 75% less energy than a 100W incandescent bulb
- Compliant with the 2009 Federal Regulations for walk-ins
- Lasts up to 10 times longer than a 100W incandescent bulb
- 26W fluorescent lighting meets Energy Act requirements of 40 lumens per Watt

## LED LIGHTS

- Long life cycle – over 50,000 hours more than alternative illumination systems
- Lower energy costs
- Reduced heat emissions
- Low voltage operation for inherent safety
- Significantly reduced maintenance costs

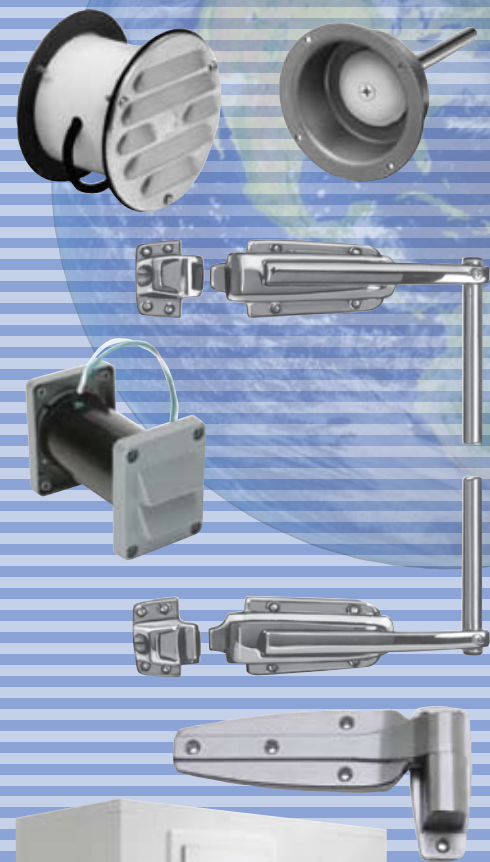

## REPLACEMENT DOORS FOR ANY WALK-IN

- Rugged, insulated urethane construction
- New and re-sized frames available for many applications
- Standard features include heavy duty cam lift hinges and internal safety release handle
- Heaters, kickplates and viewports available as options

## SLIDING DOORS

- Robust and durable for high traffic applications
- Heavy duty hardware, as standard
- Positive door seal helps maintain walk-in temperature
- Simple manual operation
- Heated door jamb

*Fully compliant with the 2009 Federal Regulations for walk-ins.*
