

**Designed by industry heavyweights...
...to handle some serious traffic.**

SuperFloor FROM CrownTonka™ WALK-INS

Floor surfaces in walk-in coolers and freezers take a real pounding from hand trucks, fork lifts*, pallet jacks and the sheer weight of the products stored upon them. SuperFloor has been tested to withstand pressure in excess of 5,000 lbs per square foot** to provide unparalleled durability against heavy traffic for years to come.

* No warranty for fork lift use

** Uniformly distributed weight

Durable

Designed for 5,000 lbs per square foot** to provide long lasting resistance to heavy traffic.

Simple Installation

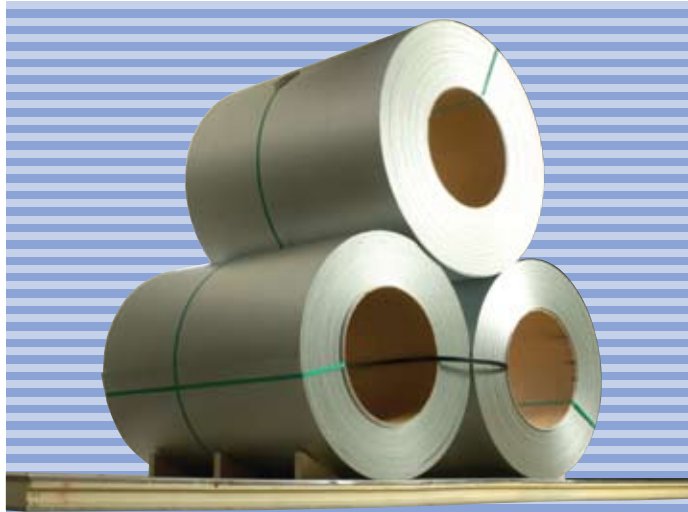

Easy installation - suitable for new build, remodel and retrofit applications.

Energy Saving

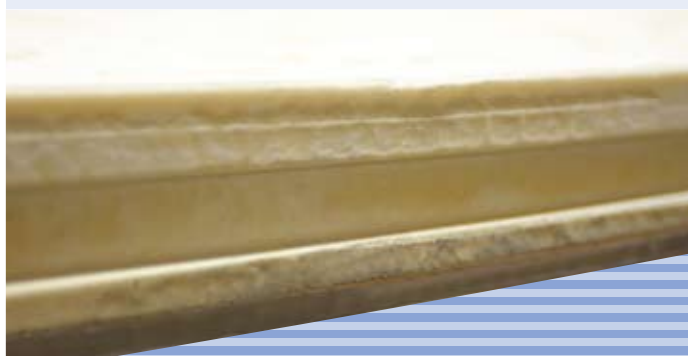

Excellent insulation properties for improved walk-in performance and reduced energy consumption.
